

AMECO TECHNOLOGY

FOR MEDICAL INDUSTRIES

PRODUCTS

About us

Ameco Technology maintains a state – of the – art product development and manufacturing facilities for disposable medical devices and components.

Ameco Technology is certified ISO 13485: 2003+AC: 2007

Ameco Technology Facilities:

- **Oxygen therapy products**

Ameco Technology is specialized in manufacturing high quality oxygen therapy products (Oxygen Mask, Nebulizer Oxygen Mask and Nasal Cannula) according to the international standards ISO 13485.

- **Medical Plastic Components**

Ameco Technology is specialized in manufacturing small sophisticated medical plastic components, which cover a wide range of sectors in the medical device industry.

- **Custom Design**

Ameco Technology has a core team of highly skilled and experienced technical engineers who are able to provide customers with innovative and cost effective solutions with a very short project time frame.

- **OEM Manufacturing**

Ameco Technology provides a wide range of OEM facilities:

- A. Plastic Injection: Specialized in injection molding of very accurate medical plastic components.
- B. Extrusion: Specialized in extruding micro tubes from O.D 0.5mm to O.D 20mm, with all plastic resins including (Medical Grade PVC)
- C. Product Assembly: provides a class 100,000 Clean room for assembling medical device

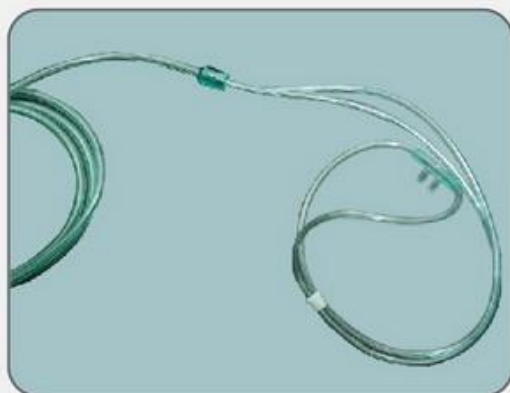

- **Mold Making**

Ameco Technology has its own mold maker who can meet all customer requirements of injection molds and extrusion dyes.

Oxygen Mask and Nasal Cannula with oxygen tube

Oxygen and Nebulization Therapy

Features

■ Mask:

- Designed for improving anatomical fit for convenient use, (Soft medical grade PVC)
- Provided with nose clip and adjustable strap

■ Nasal Cannula:

- Designed to provide maximum freedom to patient, by leaving mouth free for nutritional and communicational purposes, (Soft medical grade PVC)
- Twin Curved Flared Prong designed for improving anatomical fit and provides smooth flow of Oxygen.

■ Nebulizer

- The Nebulizer operates at a driving gas flow of the volume output will be particles

■ Tube:

- Proximal end is fitted with soft connector that is easy to connect to any Oxygen source.
- Attached soft medical grade PVC tube with inner star shape to ensure continuous flow of Oxygen.

■ Packing:

- Supplied Non-Sterile

■ Ordering information:

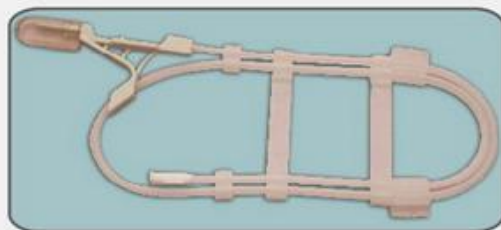

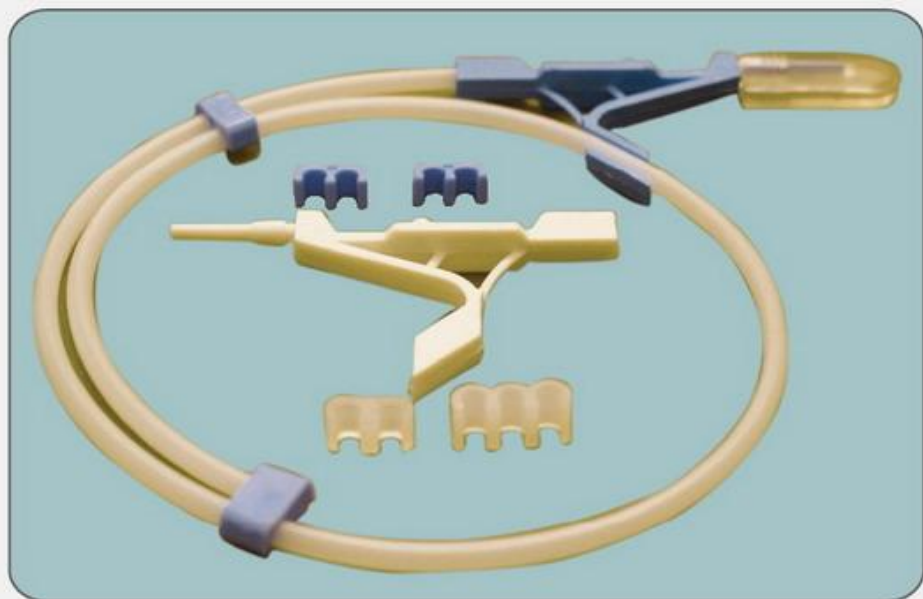

Product name	Product Code
X-Adult Oxygen Mask Kit	OXY-XAD
Adult Oxygen Mask Kit	OXY-AD
Pediatric Oxygen Mask Kit	OXY-PD
Pediatric Nasal Cannula	NC-PD
X-Adult Nebulizer Kit	Neb-OXG-XAD
Adult Nebulizer Kit	Neb-OXG-AD
Pediatric Nebulizer Kit	Neb-OXG- PD

Guide Wire Accessories

Guide Wire Accessories

Features

- Guide wire dispenser is available in different length to match all guide wires.
- Guide wire dispenser is also available in different shapes to match all packaging sizes.

Description	Product Code	Remarks
Guide wire dispenser with different length	ADV-D-XX	XX= Length
Guide wire advancer with secure cap	ADV	X
Guide with dispenser secure tube with different length	ADV-T-XX	XX= Length
Guide with dispenser Clips	GW-CLP-X	X=Channels

Catheter kits components

Catheter kits components

Features

- A very wide range of Catheter components and accessories which cover many ranges of catheters production.

Central Venous & Dialysis Catheters

Description	Product Code	Remarks
Female Luer (Different Sizes)	FL-XX	XX=Size
Clamps	Flat Clamp	
Scalpels	Scalple	
Dilators Hubs	FL-XX	XX=Size
Guide wire dispenser with different length	ADV-D-XX	XX= Length

Urology Catheter components

Description	Code	Remarks
Nelaton catheter adaptors (With Color Coding)	NEL-ADP-XX	XX=Size
Ryle catheter adaptors (With Color Coding)	RYL-ADP-XX	XX=Size
Suction with thumb control adaptors (With Color Coding)	SUC-ADP-XX	XX=Size
Feeding catheter adaptors (With Color Coding)	FED-ADP-XX	XX=Size
Umbilical catheter adaptors (With Color Coding)	UMB-ADP-XX	XX=Size
Guide wire pusher Clamp	CLMP-DJ	x
Ureteric Catheter Adaptors (With Color Coding)	UR-ADP-XX	XX=Size
Nephrostomy Catheter Connection Line	NEP-CON	X
Guide wire dispenser with different length	ADV-D-XX	XX= Length
Ureteric Catheter Stiffner	UR-STF-XX	XX=Size
Dilators Hubs	FL-XX	XX=Size
Scalpels	Scalple	x
Female Luer (Different Sizes)	FL-XX	XX=Size
Connection lines	CON-L-XX	XX=Size

Connection Lines

Connection Lines

Features

- Connection Lines are available in different lengths and sizes such as single, double and triple connection line

**AMECO
TECHNOLOGY**
FOR MEDICAL INDUSTRIES

Extrusion

Extrusion

Features

Description

- Medical PVC tubes Single Lumen
- Respiratory System Tubes (Star Shape)
- Suction Tubes - PVC
- Dialors tubes - PP - HDPE
- Guide Wire protection dispenser Tubes- HDPE
- Custom Tubes (On customer request)

Mold Making & Custom Design

Mold Making & Custom Design

Features

Description

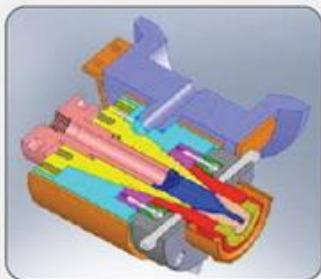

Medical injection Molds

Extrusion Dies (Standard Tubes)

Extrusion Dies (Multi Lumen Tubes)

Tip Molds

Mold Making : We have our own mold making who can fulfill all customer requirements of Injection and blow molds, and extrusion dies with different profiles.
